EDITOR :- It is generally known that nave been outraged of late by persons in disguise, shall not say here how grievously outraged but I stood alone and unarmed and they had numbers and power on their side. Under whatever impression this mob may have seted, I feel ssured they were wistaken in supposing I was breaking any law of my country or was "willing o do anything to isjure the persons or the rights fellow oltisens. I am now and have always been willing to do anything or make any sacrifice for the good of my country, and I trust the course I have determined upon will not be mong the least evidences of this spirit.

irritation of the stomach is almost invariably accompanied by irratition of the temper.

The invigorating and tranquillising operation
or Hosteter's Bifters is most powerfully developed in cases of indigestion. The first effect of
this agreeable tonic is comforting and encouraging. A mild glow pervades the system, the
chronic uneasiness in the region of the stomach
is lessoned; and the carrous restlessness which
characterizes the disease is abated. This improvement is not transient. It is not succeeded
by the return of the old symptoms with superadded force, as is always the case, when sumedicaby the return of the old symptons with superadded force, as is always the ease when unmedicated stimulants are given for the complaint.
Each dose seems to inpart a permanent accession
of healthful invigoration. But this is not all.
The sperient and antibillious properties of the

to its tonic virtues. If there is an overflow of

in cases of constipation the catharile action is
just sufficient to produce the desired result gradually and without pain. The Bitters also proually and without pain. The Bitters also promote healthy evaporation from the surface which is particularly desirable at this season when sud-

Cough, Bronchitis, Asthms, and Consumption.

Probably never before in the whole history of medicine, has any thing won so widely and as deeply upon the confidence of mankind, as this excellent remedy for pulmonary compilates. Through a long series of years, and among most of the races of men it has risen higher and higher in their estimation, as it has become better known. Its uniform character and power to cure the various affections of the langs and throat, have made it known as a reliable protector against them. While adapted to militer forms of disease and to young children, it is at the same time the most effectual remedy that can be given for incipient consumption, and the dangerdus affections of the throat and langs. As a provision against sudden attacks of Croup, it should be kept on hand in every family, and indeed as all are sometimes subject to colds and coughs, all should be provided with this antidote for them.

Although scalled Consumption is thought incurable, still great numbers of cases where the disease seemed rettled, have been completely cured, and the patient rectored to sound health by the Cherry Pectorat. So complete is its mastery over the disorders of the Lungs and Throat, that the most obstinate of them yield to ji. When nothing else could reach them, under the Cherry Pectoral they subside and disappear.

Sugares and Public Speakers and great protection from it.

Bronchitis is generally cured by faking the Cherry Pectoral in small and frequent diser. So generally are its virtues Encum, fint we need not publish the certificates of them, here, or do more than assure the public that its qualities are fully maintained.

The number and impostance of its cures in the ague districts, are literally beyond a feeding, and we believe without a paradlel in the history of Ague metione.
